KEYSTONE® 2 ONE-SIDED LOCKABLE LATCH

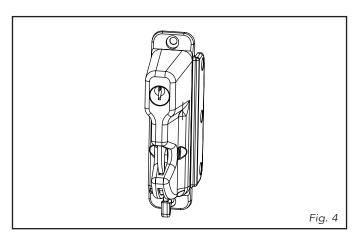

KLADV2-P1

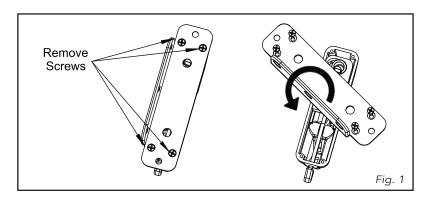

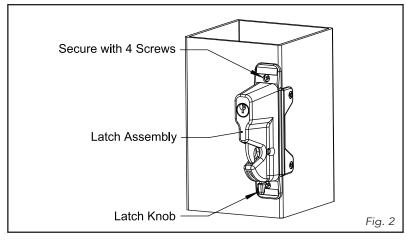

INSTRUCTIONS

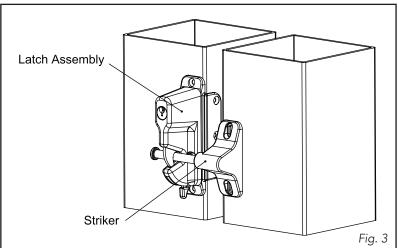

IMPORTANT: Inner components must not be disturbed while reversing the assemblies.

- The Keystone® One-Sided Latch is designed to fit both right-hand and left-hand applications. To conform to your application the latch assembly may need to be reversed. To reverse the latch assembly, remove the four screws holding the mounting base, carefully lift and rotate the mounting base (Fig. 1).
- 2. Locate the desired mounting height for the Keystone® One-Sided Latch on the fence post, mark the center points of the 4-5 mounting holes, and drill appropriate pilot holes for mounting screws. Realign latch and attach to post with the supplied flat head screws (Fig. 2).
- 3. After installing the latch assembly, position and attach the striker. With the gate closed, position the striker with striker rod within the latch assembly, behind the latch mechanism (Fig. 3).
- 4. After installation, TEST the locking and unlocking of the latch (Fig. 4).
 - A. Locking: Turn the key clockwise to the stop point, then counterclockwise to the 12 o'clock position and remove the key.
 - B. Unlocking: Turn the key counterclockwise to the stop point, then clockwise to the 12 o'clock position and remove the key.
